DETAILED ACTION

Double Patenting

1. The non-statutory double patenting rejection, whether of the obviousness-type or non-obviousness-type, is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent. *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); and *In re Goodman*, 29 USPQ2d 2010 (Fed. Cir. 1993).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(b) and (c) may be used to overcome an actual or provisional rejection based on a non-statutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.78(d).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 2-19 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 17-20 of copending Application No. 08/741,309. Although the conflicting claims are not identical, they are not patentably distinct from each other because it would have been obvious to use the equivalent method as set forth in the copending application for the claimed system, and while the claims in the two applications are not duplicates, they are so close in content that they both cover the same thing, despite a slight difference in wording.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

3. Claims 2-19 are provisionally rejected under the judicially created doctrine of obviousness-

type double patenting as being unpatentable over claims 19-21 of copending Application No.

08/232,363. Although the conflicting claims are not identical, they are not patentably distinct

from each other because the claims in the two application are so close in content that they both

cover the same thing, despite a slight difference in wording.

This is a provisional obviousness-type double patenting rejection because the conflicting

claims have not in fact been patented.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness

rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in

section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are

such that the subject matter as a whole would have been obvious at the time the invention was made to a person

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the

manner in which the invention was made.

5. Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Odle (P.N.

5,491,511).

Odle discloses the claimed invention and teaches using synchronizing signals (unique

system pointer) to retrieve and match behavioral events and transaction events. Odle does not

disclose overlaying the alpha-numeric display on the video signal of the behavioral event.

However, the type of arrangement of the display data is an obvious design choice and commonly

known practice in the art.
